PROFESSIONAL SUMMARY:

I am a dedicated Computer Science student specializing in AI and ML, seeking a professional role that allows me to take on challenging tasks and responsibilities. I want to apply my technical and analytical skills effectively while continuing to learn and grow. With a strong foundation in AI and ML, I aim to contribute to innovation and development and achieve both personal and professional goals in a forward-thinking organization.

SKILLS:

Languages: C, JAVA, Python, HTML, CSS, JS, MySQL.

Coursework: Computer networks, Operating systems, Object-oriented programming, DBMS, Cloud computing Data analytics, Data structure.

EDUCATION

B. Tech: VIDYA JYOTHI INSTITUTE OF TECHNOLOGY, Hyderabad, **CGPA: 8.96**

INTERMEDIATE: Sri Chaitanya Junior College, Percentage: **87.1% (2020-2022)**

SSC: ST. JUDE'S HIGH SCHOOL, CGPA : **10.0 (2020)**

CERTIFICATIONS

- Programming Essentials in C
 - Oracle Academy certificate in Java Fundamentals
 - Database Programming with SQL
 - Infosys Springboard in Introduction to Artificial Intelligence
 - Cisco Certificate in C, Python and Data Analytics
 - Kaggle Python
-

ACHIVEMENTS

Successfully completed **an NPTEL Certification in Python Programming, demonstrating strong programming, logical thinking, and problem-solving skills.** Earned the certification through SWAYAM.

General Academic:

Demonstrated **leadership and teamwork** abilities during group projects and academic collaborations

Volunteer, Hope Club Coordinated with team members to plan outreach programs and student engagement activities. Contributed to promoting social awareness and campus welfare projects

INTERNSHIP

AICTE: Network Security Associate Virtual Internship

Completed a **Network Security Associate Virtual Internship** supported by **Fortinet**, gaining hands-on experience in cybersecurity fundamentals, threat management, and network defense mechanisms.

Participated in a **Network Security Associate Virtual Internship (Fortinet-supported)** program involving practical exposure to network protection strategies, firewall policies, VPN configuration, and security event monitoring using Fortinet's security so

PROJECTS/RESEARCH PAPER

Project 1

Insight innovating hotel management solutions:

Developed a smart hotel management system to automate booking, billing, and customer service. Integrated AI-based analytics for forecasting occupancy and optimizing revenue. Implemented an AI chatbot to improve guest interaction and response time. Created a real-time dashboard displaying key performance metrics for data-driven decisions. Used technologies like Python, AI/ML, and React. Resulted in improved operational efficiency and enhanced customer experience.

Project 2

Road Accident Prediction Model (Machine Learning Project):

Developed a predictive model to forecast road accidents using K-Nearest Neighbors (KNN) and Support Vector Machine (SVM) algorithms. Analyzed traffic and environmental data to identify key factors contributing to accidents. Achieved [insert accuracy if known]% prediction accuracy, helping provide actionable insights for road safety improvements.

Hobbies

Volunteering or community services

Playing sports : winners in U/14 kabbadi (school)

Listening to songs, watching news and movies
